There are many filter options offered by equipment manufacturers during a given production year. It is impossible to be certain that all equipment of the same make and model will have the same engine, requiring the same filters. Please identify each engine manufacturer and model, and include OEM numbers, when possible, to help with the identification process. For these reasons, and because we have no control over the methods used to gather the information on this survey, Baldwin Filters cannot be responsible for misapplications of filters.
